

# Corian Cleaning Kit

## - How To Use

Cleaning Kit for Corian and composite countertops and sinks.

Can also be used on stone and other acrylic products with a mat surface.

### The kit includes:

Cleaner 500 ml, Sealer 500 ml, nanosponge, microfiber cloth, sponge, flexifoam pad and a sprayhead.

For daily cleaning, simply wipe the surface with a damp microfiber cloth.

Read the whole manual before use.

### 1. CLEANER

Wearing gloves shake the product well before use.

Apply directly on to the table top / sink and sprinkle with water.

The detergent will foam when you shake the bottle and should foam up a little more during treatment. Use the black sponge with vigorous circular movements to clean the surface.

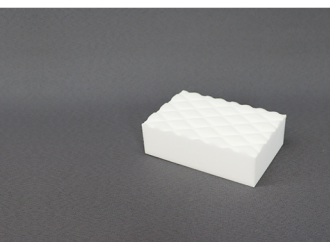

Then wash the surface with clean water and wipe dry with a cloth.

(If deeper stain or scratch removal is needed, see step 3 and 4)

### 2. SEALER

Using the sprayhead, spray the product directly from the bottle on to the surface. Leave for 10 minutes, then wipe off with a clean dry cloth. Lightly spray again then wipe off immediately with a clean dry cloth.

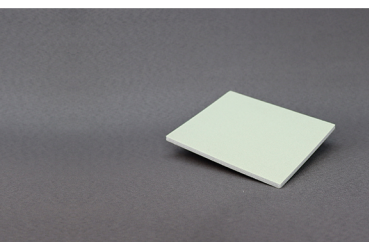

### 3. Nanosponge

This sponge acts as an eraser on stains and dirt.

Moisten the sponge with water then squeeze it out but do not twist the sponge.

Remove the stains and dirt with the sponge using circular movements. Be aware that the sponge has a gentle but abrasive effect.

Use between step 1 and 2.

### 4. Flexifoam abrasive pad\*

This is extremely effective against severe stains and minor scratches, but be careful!

Rinse the pad and squeeze out the water. Using circular movements carefully sand your countertop or sink. Try, if necessary, on a non-visible place first so you get a sense of how it works.

Use between step 1 and 2 and clean carefully before applying the sealer.

For limescale deposits, descaling agent or household vinegar can be used in sprayhead bottle. Exercise caution and try if necessary on a non-visible area if in doubt about the use of the product. Always use the mixture recommended by the manufacturer.

You should treat your countertop approx. 3-4 times a year or as needed.

*\*This must not be used on table tops that have been polished with a pad above 400 grit and not at all on glossy stone countertops, which are most often wet sanded with 2000-3000 grit. Check with your countertop supplier.*

*Dansk Boligstål AS is not responsible for incorrect use of the products in this Cleaning Kit.*

*The kit should be stored at room temperature and not below 10 degrees celsius.*
